## PROJECT

### • CRYPTO TRANSACTION MANAGEMENT SYSTEM

- It is a Blockchain based project using Web3 Technology and Smart contract for better execution.
- This Application help us to transfer cryptocurrency like Ether(Dummies ETH) from one user to another across the globe.
- Smart Contracts automates the transaction for fast and secure execution. Through Smart contract and Decentralized immutable ledger system, we can transfer Ether on our transaction management system
- Technology Stack:- Solidity, ReactJS, NodeJS, HTML, CSS , JavaScript.

### • Text2Speech APP

- TEXT2SPEECH Application is basically an Android based Application. In this project we can convert our written text into speech through this application. This Application takes the text message as an input and translate it into a voice as a result of an output.
- This App can also be used to improve the vocabulary of an individual.
- This App can also be used to improve the vocabulary of an individual.
- Technology Stack:- JAVA, XML, Texttospeech Library.

## EDUCATION

**Dr. A. P. J. Abdul Kalam Technical University**  
B.Tech in Computer Science and Engineering

Lucknow,U.P

December 2020 - July 2024

**Bishop Johnson School and College**  
Intermediate

Prayagraj,U.P

April-2019 - March 2020
